yogeshsakhivel0109@gmail.com | [LinkedIn](#) | [Portfolio](#) | Chennai | +91 8682007024

PROFESSIONAL SUMMARY

Final-year **B.E. Electronics & Communication Engineering** student with hands-on experience in Embedded Systems, IoT design, web designing and **PCB fundamentals**. Skilled in C programming, basic of Python, networking concepts, and microcontroller-based development. Worked on innovation-driven projects including an **AI-based Smart Helmet safety system**. Strong in leadership, problem-solving, and teamwork, seeking an entry-level engineering role to contribute to real-world solutions.

EDUCATION

- B.E Electronics and Communication Engineering (2022 - 2026)
(Agni college of Technology, Chennai) - CGPA : 8.3 (No History of Arrears)
- Higher Secondary School (2021 - 2022)
(Government Higher Secondary School, Sivaganga) - Percentage : 75%

SKILLS

PCB Design : Schematic Capture, PCB Layout, Routing, DRC Checks, Gerber Generation (KiCAD, EasyEDA).
Embedded Systems & IoT: Arduino, Raspberry Pi, Sensor Integration, Real-Time Data Acquisition.
Programming Languages: Python, C, Java, Javascript SQL.
Web Development & UI/UX: HTML, CSS, Angular, React, UI/UX Design.
Tools & Platforms: VS Code, KiCad, Git/GitHub, Figma, Canva, Docker.
Soft Skills: Leadership, Problem Solving, Time Management, Active Learning, People Management, Presentation Skills.

PROJECT

Smart Helmet System with Rider Authentication & Road Hazard Detection - Developed an IoT-based smart helmet system to enhance rider safety with authentication and helmet detection. Implemented road hazard warning features to alert users about unsafe obstacles and conditions. Included accident detection with GPS-based emergency alerts using embedded systems and wireless communication.

Fake URL Detector (Machine Learning Project) - Created a machine learning-based tool to analyze and detect phishing or fake URLs. Helps protect users from cyber fraud and unsafe websites. Strengthened skills in ML and cybersecurity fundamentals.

Mining Monitoring Dashboard (Company Project – Garuda Aerospace)-Worked on the frontend and UI development of a drone-based mining monitoring system during my internship at Garuda Aerospace. Designed responsive dashboard interfaces to support real-time site inspection and survey visualization. Improved usability and data presentation using modern web technologies and UI/UX principles.

EXPERIENCE

UI Developer Course - Organized by ICT Academy & Infosys Foundation (July 21 – August 13, 2025)
Completed an intensive UI Development Program, gaining hands-on experience in HTML5, CSS3, JavaScript, Angular, React.js, and UI/UX best practices. Developed real-world front-end projects and enhanced both technical and professional skills aligned with industry standards.

Intern – Garuda Aerospace Private Limited - Chennai | Ongoing Internship
Currently working as an intern gaining hands-on exposure to aerospace and drone-based technologies. Involved in understanding real-time engineering applications, embedded systems integration, and innovative project development. Developing practical skills in teamwork, problem-solving, and industry-level technical workflows.

CERTIFICATE

UI Developer Course - ICT Academy & Infosys Foundation (2025)
Introduction of MongoDB - Mathwork
C programming Language - Skill Rack
Introduction of AI&ML - Great Learning

ACHIEVEMENTS

Best Rylarian Award - HUG RYLA 3.0 (2023)
College Technical Symposium President (2026)
National level Volleyball Runner - U/17 (2021)
TI MSP430 Mentor Competition - 2nd Place (2024)
